Ball Packaging Europe

In 2007 Ball Packaging Europe took the decision to locate its proposed beverage can manufacturing facility in the Rostov Region of Russia. BPE needed to move fast, which required a reliable local partner to provide legal & accountancy consulting services. Fortunately, such a partner was available in the person of CJSC MauerGroupRostov.

Working in cooperation with BPE and its other business partners, specialists of MauerGroupRostov supported the due-diligence, acquisition & merger activities associated with the successful formation of Ball Packaging Europe Rostov LLC.

CJSC MauerGroupRostov continues to provide on-going support to BPE Rostov LLC having firmly established themselves as a reliable business partner.

Best regards,

Anthony Barnett
